Traceability in medical X-ray imaging dosimetry

**First announcement
Save the dates**

**September
1st - 3rd 2025**

**Greek Atomic Energy Commission
(EEAE), Athens, Greece**

Workshop for radiation metrologists on calibration of dosimeters used for X-ray imaging

This workshop is designed to update calibration laboratories on the new measurement calibration and type testing procedures developed in the project, for dosimeters used in X-ray imaging. The goal is to integrate these developments in XMM calibrations to enhance calibration accuracy and thereby optimizing patient safety.

Topics to be covered

- X-ray dosimetry equipment
- Calibration procedures in XMs
- Uncertainties
- Hands-on training
